to Generate Support for Smoke-Free Multifamily Housing among Friends, Family, Colleagues

Dear [friend/family/colleague],

Did you also know that our city has no smoke-free multifamily housing policy?

When people smoke, it emits harmful substances into the air around them. Secondhand smoke contains over 7,000 chemicals, and is linked to certain cancers and other diseases.

People in our community who live in apartments and other multifamily units have to share air with smokers who live close by, with no choice but to breathe dangerous secondhand smoke.

CDC researchers say that "there is no risk-free level of exposure to secondhand smoke."

Our city can protect our neighbors with a smoke-free multifamily housing policy.

Thanks to an Action Pack from *Salud America!*, a national health equity program based at UT Health San Antonio, we have a strong introductory email, talking points, and social media messages to reach out to city and community leaders and build support.

We need your help, too. I would love your support to:

- Contact our local leaders about the potential implementation of a smoke-free multifamily dwelling policy. You can find your leaders' contact info using *Salud America!*'s "Smoke-Free Multifamily Housing" action pack: http://salud.to/smokefreeleaders
- Share smoke-free messages (http://salud.to/smokefreesocial) and infographics (http://salud.to/smokefreefacts) on your social media platforms.

I look forward to your support. I would be glad to chat more if you'd like.

Thank you,
